## About the Event

---

**The Indonesia OpenInfra Days** brings together users, business, developers, and operations from various organizations including enterprises, SMEs, governments, universities, NGOs, cloud providers, and technology providers to discuss IT infrastructure that utilize open source software and hardware. Open source technologies that recently arose on providing reliable cloud infrastructure services including OpenStack, StarlingX, Airship, Kubernetes, Docker, Ceph, GitLab, Jenkins, Elastic Stack, Terraform, Ansible, Prometheus, Kata Containers, Hadoop, Open Compute, Open Networking, HPC, Machine Learning, Blockchain, IoT, and other technologies.

The event is a 1 day conference with Single Session format containing Keynote Speech, Talk, and Lightning Session. This event is an improvement of the OpenStack Day event with wider discussion material and higher number of participants. Indonesia OpenInfra Day was planned to be held regularly at least annually.

In 2021, **The Indonesia OpenInfra Days** will be held on **Saturday, August 21st 2021** virtually with a target 250 number of participants. This event is organized and managed by OpenStack Indonesia Community.
